THE

AMERICAN JOURNAL

OF

SCIENCE AND ARTS.

CONDUCTED BY

PROFESSORS B. SILLIMAN, B. SILLIMAN, JR.,

AND

JAMES D. DANA,

IN CONNECTION WITH

PROFESSORS ASA GRAY, LOUIS AGASSIZ, AND
WOLCOTT GIBBS, OF CAMBRIDGE,

AND

PROFESSORS S. W. JOHNSON, GEO. J. BRUSH, AND
H. A. NEWTON, OF NEW HAVEN.

SECOND SERIES.

VOL. XXXVIII.—NOVEMBER, 1864.

NEW HAVEN: EDITORS.
1864.

PRINTED BY E. HAYES, 426 CHAPEL ST.

CONTENTS OF VOLUME XXXVIII.

NUMBER CXII.

Page.

ART. I. On certain Harmonies of the Solar System; by Professor DANIEL KIRKWOOD, - - - - - - - - - 1

II. Abstract of Prof. Meissner's Researches on Oxygen, Ozone, and Antozone; by S. W. JOHNSON, - - - - - 18

III. On the Transparency of the Earth's Atmosphere; by CLEVELAND ABBE, - - - - - - - - - - - 28

IV. On the Distribution of the Dark Lines in the Spectra of the Elements; by Prof. GUSTAVUS HINRICHS, - - - - 31

V. On the structural characters of the so-called Melanians of North America; by Dr. WM. STIMPSON, - - - - - 41

VI. The Original accounts of the displays in former times of the November Star-Shower; together with a determination of the length of its cycle, its annual period, and the probable orbit of the group of bodies around the sun; by H. A. NEWTON, - - - - - - - - - - - - 53

VII. On Molecular Physics; by Prof. W. A. NORTON, - - 61

VIII. On the Improvement of the Elements of a Comet's Orbit: Brunnow's method; communicated by C. ABBE, - - 79

IX. Notes on the Platinum Metals, and their separation from each other; by M. CAREY LEA, - - - - - - - 81

X. Contributions to Lithology; by T. STERRY HUNT, M.A., F.R.S., 91

XI. On the so-called "Barrel-Quartz," of Nova Scotia; by B. SILLIMAN, Jr., - - - - - - - - - - - 104

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the constitution of the Sun, MAGNUS, 106.—On the Spectrum of Thallium, W. A. MILLER: On the photographic transparency of various bodies, and on the photographic effects of metallic and other spectra obtained by means of the electric spark, W. A. MILLER, 107.—On the spectrum of chloro-chromic acid, GOTTSCHALK and DRECHSEL: On the condensation of vapors upon the surface of solid bodies,

109.—On the influence of condensation in experiments on diathermancy, MAGNUS: Mr. Scoutetten on the electricity of the blood, 110.—Note on Binocular Vision, 111.—On the isomorphism of silica with deutoxyd of manganese, G. ROSE: On a new cobalt compound, BRAUN: Indium, 113.—Note on the formation of Aldehyds, by M. CAREY LEA, 114.

Mineralogy and Geology.—Pollux, a silicate containing a large amount of Cæsium, PISANI, 115.—Composition of Tourmaline, Mica, Hornblende and Staurotide, A. MITSCHERLICH: Contributions to the chemical knowledge of several minerals, by C. F. RAMMELSBERG, 116.—On a Volcanic Island in the Caspian, by Count MARSCHAL, 118.—Notes on the Geology and Mineralogy of the Spanish Province of Santander, by Prof. WM. K. SULLIVAN, Ph.D., etc., and JOSEPH P. O'REILLY, C.E.: Notes on a Cave and Coal Pit near Peking, by S. WELLS WILLIAMS, 119.—On the probable identity of the Oneida Conglomerate of Central New York with the Medina formation, in a letter from E. JEWETT, 121.—Coal in the Alps of Mt. Cenis: On some new Fossils from the Lingula-flags of Wales, by J. W. SALTER, etc., 122.

Botany and Zoology.—Heath (Calluna vulgaris) in North America, 122.—Lessons in Elementary Botany, etc., by DANIEL OLIVER, F.R.S., etc., 124.—Radicle-ism, 125.—Göthe's Essay on the Metamorphosis of Plants: Equisetum, 126.—A. Braun on Marsilia and Pilularia, 127.—A National American Herbarium: Annual Report of the Trustees and of the Director of the Museum of Comparative Zoology, Cambridge, 128.—Observations on the development of Raia Batis, by JEFFRIES WYMAN, M.D., 129.—On the Embryology of Echinoderms, by ALEXANDER AGASSIZ: On Dimorphism in the Hymenopterous genus Cynips, etc., by BENJ. D. WALSH, M.A., 130.—On the mineral secretions of Rhizopods and Sponges, by G. C. WALLICH, 131.—On the Law of the Production of the Sexes in Plants and Animals, by Prof. THURY, 132.—Catalogue of North American Butterflies, by J. WM. WEIDEMEYER, 135.

Astronomy.—Altitudes of Shooting Stars, compiled by H. A. NEWTON, 135.—On Sunspots and their connexion with Planetary Configurations, by BALFOUR STEWART, Esq., 141.—Observations on the Spots on the Sun from Nov. 9, 1853, to March 24, 1861, made at Redhill, by R. C. CARRINGTON, F.R.S., 142.

Miscellaneous Scientific Intelligence.—Medal of the Royal Society to Professor William Thomson, 144.—Award of the Wollaston Gold Medal to Sir R. I. Murchison: Man formerly accompanied by the Reindeer in Central France, LARTET and CHRISTY, 145.—On the Geography of British Columbia and the Condition of the Cariboo Gold District, by Lieut. H. S. PALMER, 146.—A newly discovered pass across the Andes, 147.—Violet colors from iodine: The Holy Land and Dead Sea: Bone-Cave in Borneo: Heights in the Rocky Mountains: Astronomy in France: Law for the primary and secondary barometrical maxima and minima in each half-month: Chicago Observatory, 148.—*Obituary.*—Rudolph Wagner: Evan Pugh, Ph.D., 149.

Miscellaneous Bibliography.—Metallurgy: The art of extracting metals from their ores, and adapting them to various purposes of manufacture, by JOHN PERCY, M.D., F.R.S., 149.—Annual Report of the Board of Regents of the Smithsonian Institution for the year 1862: Parrish's Practical Pharmacy, 150.—Tables d'Intégrales définies, in Verhandelingen der Koninklijke Akademie van Wetenschappen, 151.—Notices of New Works and Proceedings of Societies, 151, 152.

NUMBER CXIII.

Page.

ART. XII.—Barometric Indications of a Resisting Aether; by PLINY EARLE CHASE, M.A., S.P.A.S., - - - - - 153

XIII. On the Action of Oil-Wells; by Prof. E. W. EVANS, - 159

XIV. Description of a new Machine for Cataloguing and Charting Stars; by G. W. HOUGH, A.M., - - - - - - 166

XV. Contributions to Lithology; by T. STERRY HUNT, M.A., F.R.S., 174

XVI. Description of a new species of Chiton; by WILLIAM PRESCOTT, M.D., - - - - - - - - - - 185

XVII. On the rising of Springs and Streams in California, before the winter rains; by H. GIBBONS, M.D., - - - 187

XVIII. Notes on the New Almaden Quicksilver Mines; by B. SILLIMAN, Jr., - - - - - - - - - - 190

XIX. Observations on a Seam of Coal; by Prof. E. B. ANDREWS, 194

XX. On the Chimenti Pictures; by Prof. CHARLES A. JOY, - 199

XXI. Results of some recent Observations on the Solar Surface, with Remarks; by the Rev. W. R. DAWES, - - - 203

XXII. On Molecular Physics; by Prof. W. A. NORTON, - - 207

XXIII. Notice of the Remains of a Mastodon recently discovered in Michigan; by Prof. ALEXANDER WINCHELL, - - 223

XXIV. Chladnite of the Bishopville Meteoric Stone proved to be a Magnesian Pyroxene; by Prof. J. LAWRENCE SMITH, - 225

XXV. Aerial Tides; by PLINY EARLE CHASE, M.A., etc., - 226

XXVI. Extracts from the Address of Dr. J. W. DAWSON, President of the Natural History Society of Montreal, - - 231

XXVII. On Celestial Dynamics; by J. R. MAYER, - - - 239

XXVIII. On a supposed change of level in a part of the Green Mountains; by W. K. SCOTT, M.D. From a letter to Prof. O. P. HUBBARD, - - - - - - - - - - 243

XXIX. Notes on the Platinum Metals; by M. CAREY LEA. Part II. On Reactions of the Platinum Metals, - - - 248

XXX. Progress of the Geological Survey of California, - - 256

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On a new class of Sulphur compounds, VON OEFELE: On a very sensitive reaction for Iron, NATANSON: On the conversion of mono-carbon acids into the corresponding more highly carbonated di-carbon acids, KOLBE and MÜLLER, 265.—On Thallium, CROOKES: On Cobaltic acid, WINKLER, 266.—New method of

reduction especially applicable to a large number of metals: Bromid of potassium, a powerful narcotic: Elements of Chemistry, Theoretical and Practical, by WILLIAM ALLEN MILLER, M.D., LL.D., &c.: Manual of Qualitative Chemical Analysis, by Dr. C. R. FRESENIUS—American edition, edited by Prof. SAMUEL W. JOHNSON: On the nature of Heat-vibrations, by Mr. JAMES CROLL, 267.—On Periodic Changes in the Magnetic condition of the Earth, and in the Distribution of Temperature on its Surface, by Mr. BAXENDELL, F.R.A.S., 269.

Mineralogy and Geology.—Analysis of Swedish and Norwegian Minerals, by J. A. MICHAELSON, 274.—Kokscharovite, HERMANN, 275.—Samarskite, FINKENER: Kupfferite: Planerite, a new mineral, HERMANN, 276.—Forcherite, AUHHORN: Garnet, PISANI: Native zinc, PHIPSON: Esmarkite, PISANI: Infusorial earth from Bohemia: R. HOFFMANN: On a cavern with human remains in the Pyrenees, by Messrs. F. GARRIGOU and L. MARTIN, 277.—On further discoveries of Flint Implements and Fossil Mammalia, by J. WYATT, Esq., F.G.S.: On some recent discoveries of Flint Implements in Drift Deposits in Hants and Wilts, by JOHN EVANS, Esq., F.G.S., 280.—Lake-dwellings or Pfahlbauten in Bavaria: On some Bone- and Cave-deposits of the Reindeer period in the south of France, by Mr. JOHN EVANS, F.R.S.: On the Cavern of Bruniquel and the Human Remains found therein; by Prof. OWEN, 281.—On Human Remains in Caves at Gibraltar, by GEO. BUSK, 282.—On the Rhætic Beds and White Lias of Western and Central Somerset, and the Discovery of a new Fossil Mammal, by Mr. W. BOYD DAWKINS, 284.—Mesozoic Mammals: On the transitions between the subdivisions of the Lias and Oolite in England, by Prof. A. C. RAMSAY, F.R.S., 285.—On the Permian Rocks of the Northwest of England, and their extension into Scotland, by Sir R. I. MURCHISON, K.C.B., etc., and Prof. R. HARKNESS, F.R.S., etc., 287.—On the Reptiliferous Rocks and Footprint Strata of the Northeast of Scotland, by Prof. HARKNESS, F.R.SS., L. & E.: Coal in Venezuela, 288.—On the Geology of Arisaig, Nova Scotia, by Rev. D. HONEYMAN, F.G.S., 289.

Botany and Zoology—New Scirpi of the Northern United States, 289.—De Candolle, Prodromus Systematis Naturalis Regni Vegetabilis, etc., 290.—Bryology of British N. W. America: Icones Muscorum, by W. S. SULLIVANT: On the Currant Worm of Ann Arbor, Michigan; by Prof. A. WINCHELL, 291.—Casts of various parts of the structure of the Gorilla, 292.—Animalcules in the blood: Cephalic vertebræ: Marine Crustaceans in freshwater lakes of Norway, 293.—Hymenoptera: Didunculus: Note on the Muscovy Duck, by Mr. HILL: The Elements of Comparative Anatomy, by Prof. THOMAS HENRY HUXLEY, F.R.S., 294.—Cast of the Megatherium Cuvieri, in the Museum of the Rochester University: Recherches sur la Faune Littorale de Belgique, par Prof. P.-J. VAN BENEDEN, 295.

Astronomy.—Note on a Meteor, by JOHN GARDNER, 295.—List of Radiant Points in Shooting Stars, by Prof. HEIS: New Comet, 296.

Miscellaneous Scientific Intelligence.—Further Human remains from the Quarry of Moulin-Quignon: Interoceanic canal across the Isthmus between the two Americas, 297—Note supplementary to the article on the Progress of the Geological Survey of California, 298.—A New Silkworm: A new style of barometer—effect of atmospheric pressure on Gunnery: Paper from Maize: Preservation of wood: Morid's process for recovering writing nearly effaced: The ravages of Insects a cause of their destruction, 299.—Means of hardening fragile or friable specimens: Elevation of Lake Geneva above the sea: Investigations in Egypt: Isthmus of Suez: Making of Oases: Acclimation of English Birds in Australia: Dedication of the Museum of the Bost. Soc. of Nat. History: Universal Exhibition at New Zealand, 300: British Association: Sir Charles Lyell: Prize to Mr. Ruhmkorff: Prize to Mr. Sorel: Alger's Cabinet of Minerals for sale, 301.

Obituary.—Evan Pugh, Ph.D., F.C.S., 301.—Francis Alger, 302.

Miscellaneous Bibliography.—Review of American Birds in the Museum of the Smithsonian Institution, by S. F. Baird: Observations on the Terrestrial Pulmonifera of Maine, etc., by Edward S. Morse: The American Annual Encyclopedia and Register of Important Events of the year 1863: Passages from the Life of a Philosopher, by Charles Babbage, 303.—Notices of New Works, 304.

NUMBER CXIV.

Page.

Art. XXXI. Heinrich Rose, - - - - - - - - - 305

XXXII. On the cellular structure of Actinophrys Eichornii; by Prof. H. James Clark, - - - - - - - - - 331

XXXIII. On the origin of the Prairies of the Valley of the Mississippi; by Prof. Alexander Winchell, - - - - - 332

XXXIV. On the Nebular Hypothesis; by David Trowbridge, A.M., 344

XXXV. Note on a Colored derivative of Naphthaline; by M. Carey Lea, - - - - - - - - - - 360

XXXVI. On the study of the Electric Spark by the aid of Photography; by Prof. Ogden N. Rood, - - - - - - 361

XXXVII. Dependence of Terrestrial Magnetism on Atmospheric Currents; by Pliny Earle Chase, M.A., S.P.A.S., - - 373

XXXVIII. On the Principal Causes of Barometric Fluctuations; by Pliny Earle Chase, M.A., S.P.A.S., - - - - 380

XXXIX. A new Meteoric Iron from Wayne County, Ohio.—Some remarks on the recently described Meteorite from Atacama, Chili; by Prof. J. Lawrence Smith, - - - - - 385

XL. On a Process of Organic Elementary Analysis, by Combustion in a Stream of Oxygen Gas; by C. M. Warren, - 387

XLI. On Celestial Dynamics; by J. R. Mayer, - - - 397

XLII. Notice of a new fossil Annelid (Helminthodes antiquus), from the Lithographic Slates of Solenhofen; by O. C. Marsh, F.G.S., - - - - - - - - - - 415

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the wave-lengths of the luminous and ultra-violet rays, Mascart, 415.—On the determination of wave-lengths by means of interference bands, Bernard, 416.—On the atomic weight of Thorium and the formula of Thoria, Delafontaine, 417.—On Yttria, Popp, 418.—On the separation of Cerium from Lanthanum and Didymium, Popp: On Wasium, Popp and Delafontaine: Preliminary notice of a new earth, Bischof, 419.—Thallium: Refractory character of alumina and silica, C.

BISCHOF: On the magnetic period depending on the Sun's rotation; by Prof. GUSTAVUS HINRICHS, 420.—The Electric Discharge, FEDDERSEN, 421.—Interesting Electrical Phenomenon; by C. PIAZZI SMYTH, 423.

Mineralogy and Geology.—On Meteoric Irons; by H. HAIDINGER: On artificial Anatase, Brookite, and Rutile; by Mr. HAUTEFEUILLE, 424.—Bishopville meteorite; Chladnite, 425.—Crystals of Rhombohedral and Dimetric species often optically biaxial, BREITHAUPT: Geschichte der Mineralogie von 1650-1860 (History of Mineralogy from 1650 to 1860) by Franz von Kobell, 426.—Mineralogische Notizen by Friedrich Hessenberg: Note on the volcanic peaks of Cotopaxi and Arequipa; by J. D. DANA: The Dinotherium an Elephantine Marsupial, 427.—H. von Meyer's Palæontographia; Beiträge zur Naturgeschichte der Vorwelt, 428.

Botany and Zoology.—A new American station for Heather, 428.—Icones Muscorum, or Figures and Descriptions of most of those Mosses peculiar to Eastern North America which have not been heretofore figured, by William S. Sullivant, LL.D, etc.: Species Filicum of Sir W. J. Hooker, 429.—On the Skeleton of the Gare-fowl (Alca impennis), and the probability of its being an extinct species; by Prof. OWEN: Synopsis of the Bombycidæ of the United States, of A. S. Packard, Jr.: Review of American Birds, etc., by Prof. Spencer F. Baird: Cryptochiton Stelleri, 431.

Astronomy.—Discovery of another minor Planet, Sappho, (80): Comet II, 1864: Tempel's Comet: Shooting stars on the night of Aug. 9-10th, 1864, 432.—Report on Luminous Meteors; by Mr. J GLAISHER, 433.—On the possible Connexion between the Ellipticity of Mars, and the general Appearance of its Surface; by Prof. HENNESSY, 435.

Miscellaneous Scientific Intelligence.—Discovery of Lake-habitations in Bavaria; by Prof. DESOR, 437.—On Spontaneous Generation and semi-organized bodies; by E. FREMY, 439.—Charcoal having the solidity and texture of mineral coal formed under pressure: On the Field of Vision in Man; by F. FOUCOU: Petrifaction of Animal Substances, 441.—Manna-lichen of Pallas, 442.—On an ancient Factory of flint implements; by Abbé C. CHEVALIER: Discovery of Fossil Stone Implements in India, 445.—Postscript to Prof. Winchell's article on the Origin of the Prairies; by the Author, 444.—A jet d'eau made by means of the heat which air, when confined under glass, derives from the solar rays, 445.—Method of destroying the larvæ of Weevils: British Association: Report to the British Association, at Bath, on a uniform system of Weights and Measures, 446.—Analysis of a Hot Spring containing Lithium and Cæsium in Wheal Clifford; by Dr. W. A. MILLER, V.P.R.S., 447.—On the Temperature of the Sexes; by Dr. DAVY: On Crude Paraffin Oil; by Dr. B. H. PAUL: German Association, 448.—White Fish of the Great Lakes of North America, 449.

Obituary.—Francis Alger, 449.—Capt. John Hanning Speke, 449.

Miscellaneous Bibliography.—Canadian Naturalist and Geologist, 449.—Organic Philosophy, or Man's true place in Nature; by HUGH DOHERTY, M.D.: The Geological Magazine, a Monthly Journal of Geology; edited by T. RUPERT JONES, F.G.S., etc., assisted by HENRY WOODWARD, F.G.S., etc.: Introduction to "The Alpine Guide;" by JOHN BALL, M.R.I.A., F.L.S., etc.: Revision of the Polyps of the Eastern Coast of the United States; by A. E. Verrill, 450.—Notices of New Works, 451.

Index, 452.

ERRATA.

P. 128, bottom line, for "her," read "other."—P. 192, l. 7 from bottom, for "plain," read "plane."—P. 193, l. 13 from top, for "48,000," read "4,800."—P. 291. l. 25 from top, for "Muscovum," read "Muscorum."—P. 299, l. 20 from bottom, for "fattening," read "fertilizing."—P. 427, for "Cotapaxi," read "Cotopaxi."
